JENEsys Edge® VAV Controller 2.1

Attention Lynxspring Technology and Business Partners:

We are excited to announce the release of JENEsys Edge® VAV version 2.1. This next-generation advanced IP-Based Niagara Framework controller just got better. Packed with all the same features as the original release, 2.1 includes the following updates:

- **_VAV Configuration Tool_**
  User-friendly interface to speed configuration and reduce import failure.
- **_Archiving for Continuous Commissioning_**
  Commissioning log archives for historical maintenance history data.
- **_Updated User Interface_**
  Improved layout with an **Engineering View** and a **User View**
- **_VAV Floorplans & Summaries_**
  Visualize key points and space temperatures.

In addition, enhancements and updates have been made to the Supervisor and VAV Niagara Stations. For details on these modifications and version compatibility, please refer to the **Station Release Notes**. All new JENEsys Edge® VAV controller orders will ship with the 2.01.18 VAV station.

The JENEsys Edge® VAV blends the power and flexibility of a cost-effective, IP controller with Niagara 4, and ease of use, making it ideal for zone-level temperature and air quality control applications from small and medium locations to large commercial building complexes.

For a closer look at its features, please refer to the **JENEsys Edge® VAV Data Sheet**

For a sales-focused presentation please download the **JENEsys Edge® VAV PowerPoint**

Lynxspring featured the powerful, lightning-fast JENEsys Edge® VAV at this year's AHR Expo. You can see a video that covers the highlights of some of its many benefits **Here**

More details and downloads can be found on our **Partner Resources** page and by contacting your Sales Development Manager. Orders can be placed on our **E-store** or via **orders@lynxspring.com**
