LYNXSPRING®

JENEsys Edge® Controllers: Proudly Made in the USA

As a leader in building automation, integration and edge-to-cloud solutions, Lynxspring remains committed to deliver high-quality, reliable, open standard and secure products that meet the evolving needs of the industry.

Manufacturing JENEsys Edge® Niagara IP controllers in the U.S. ensures greater supply chain resilence, faster delivery times, and stringent quality control—all while supporting domestic manufacturing and innovation.

Designed for intelligent edge computing, secure connectivity and easy data access, JENEsys Edge controllers empower building operators, system integrators and equipment manufacturers with open, efficient, scalable, and interoperable building automation and integration solutions.
